Surrender Meter

If you intend to stop printing postage from Stamps.com Internet Postage and wish to close your account, you must give up access to your Postage Meter ("surrendering your meter"). You will be refunded any remaining balance in your meter by the USPS. This check will be mailed to the address we have on file. If you want your refund to be mailed to a different address, please fill out the information to the right.

Reason for Surrendering Meter

☒ Moving
☐ Dissatisfied with service
☐ Out of Business

Address 2

Error Type	Approach 1	Approach 2	Approach 3
1. Postal Server Network 2. Internet Connection	<ul style="list-style-type: none"> CSR logs request as per normal in CRS software CSR or Payment Administration accesses the server error log on a daily basis (log contains only error and time of error) using a printout only CSR manually scans log to verify request and failure, and match time of error If request is verified, CSR updates record through CS interface. This causes automatic e-mail to notify customer of credit. This interface records reason of credit, and is free-flow. Does not explicitly credit the print transaction. If request is not verified, refer to Misprints Policy (CSR can override) If customer calls back, CSR can override with credit. 	<ul style="list-style-type: none"> CSR has real-time access to the server error log. Log is parsed and generated based on meter # and customer ID. The log can be queried by date and/or by customer ID and/or by meter ID and/or by error type Verifiable requests can be approved instantly Non-verifiable requests are at CSR's discretion Credits can be made directly to meter, rather than service account 	<ul style="list-style-type: none"> Same as approach 2 except CSR also has access to the customer's profitability score (an A, B, C score based on metrics such as pricing plan, any fees paid, customer service usage, etc.) For non-verifiable requests, A's are automatically granted refunds B's and C's are handled at CSR's discretion
3. Customer's hardware/client software	<ul style="list-style-type: none"> CSR logs request as per normal in CRS software Client mails misprint, if available CSR validates receipt and updates customer record If error can't be verified, refer to Misprints Policy CSR can override this at their discretion 	<ul style="list-style-type: none"> CSR has real-time access to a client error log (similar to server error log). Client log is maintained on server and is updated on each print The log can be queried by date and/or by customer ID or Meter ID and/or by error type Verifiable misprints can be approved instantly Non-verifiable requests are at CSR's discretion Credits can be made directly to meter, rather than service account 	Same as Postal Server Network / Internet Connection
4. Printer Connection 5. Printer	<ul style="list-style-type: none"> CSR logs request as per normal in CRS software Client mails misprint, if available CSR validates receipt and updates customer record If no misprint available, refer to Misprints Policy CSR can override this, at their discretion 	<ul style="list-style-type: none"> CSR has near real-time access to the customer's request/refund history (Shows date/time of request, error type, amount, if it was granted, and reason) Based on results, CSR can automatically grant or deny the request If the request seems questionable, CSR can still ask for misprint to verify Credits can be made directly to meter, rather than service account 	<ul style="list-style-type: none"> CSR has real-time access to the customer's request/refund report as well as the customer's profitability score (an A, B, C score based on metrics such as pricing plan, any fees paid, customer service usage, etc.) A's are automatically granted refunds for Reimbursement Postage B's and C's are handled at CSR's discretion

FIG. 70

Code	Envelope State	Description	Server Action
00	No 2 nd Scan	Passed, no problems	Log Date - No status change
01	Not Passed	Other, requires manual entry	Suspend Customer
02	Not Passed	Indicia Scanned but Misprinted	Suspend Customer
03	Not Passed	FIM Error	Suspend Customer
04	Not Passed	Address Error	Request Customer send another envelope, reset expected time to 20 days
05	Not Passed	Postnet Barcode Error	Request Customer send another envelope, reset expected time to 20 days

FIG. 90

Line Item Ref	Term	Definition
1	Previous Day Ending Account Balance	Total amount of customer deposits within CMRS database. Set amount to zero (\$0.00) since customers do not have the option of depositing funds with the USPS
2	ACH Debit Collections from Lockbox Bank	Total amount of ACH debit file. Total of all ACH postage transactions submitted for processing during the 24-hour reporting cycle, including customer purchases, free postage, credits, etc. (if applicable)
3	Credit Card Collections	Total amount of credit card transaction processed for day. Total of all credit card postage transactions submitted for processing during the 24-hour reporting cycle, including customer purchases, free postage, credits, etc. (if applicable). This applies to both Merchant and Agent Models
4	Total Meter Resettings	Total amount of funds reset on customer meters. Total amount added to customers' accounts during the 24-hour reporting cycle
5	ACH Debit Reversals	Total amount of funds removed from customer's account as a result of a returned ACH transaction. (Details should be provided on a separate sheet). Individual postage purchase transactions that were rejected by the ACH processor should be listed in a section labeled "Rejected Transactions" on the attached schedule (see "DBAR Detailed Schedule"), including the effective date that the transaction was originally submitted, the device identification number, and the amount. Individual postage purchase transactions that were returned and retired should be listed in a section labeled "Returned and Retired Transactions" on the attached schedule (see "DBAR Detailed Schedule"), including the date the returned transaction was processed by Stamps.com, the device identification number, and the amount. The "Total ACH Reversals" should be derived from the subtotals of "Rejected Transactions" and "Returned and Retired Transactions" and included on the attached schedule (see "DBAR Detailed Schedule")
6	Credit Card Charge Backs	Total amount of fatal credit card transactions. Individual credit card postage purchase transactions that were subsequently identified as being returned as a charge back should be listed in a section labeled "Credit Card Charge Backs" on the attached schedule (see "DBAR Detailed Schedule"), including the date that the transaction was processed by Stamps.com, the device identification number, and the amount
7	Miscellaneous Adjustments	Total amount of adjustments made to DDA not in any of the above categories. Based on the current design of the postal system, this line item should not apply to Stamps.com
8	Ending Account Balance	Amount should be zero since we do not give customers the option of depositing funds with the USPS
